

VINAY KULKARNI

LEAD CONSULTANT

Bengaluru, India | +91-8951177248 | vinaykoppal@gmail.com | github.com/vinaykumarkulkarni/Portfolio

PROFESSIONAL SUMMARY

Software engineering professional with 12 years of experience in web application development, frontend engineering, full-stack delivery, testing and production support. Strong background in React.js, Redux, JavaScript/ES6+, Next.js and Node.js, with earlier experience in AngularJS, jQuery, C#, ASP.NET and SQL Server. Experienced in translating business requirements into maintainable features, building reusable UI components, test-driven development, automated testing and deployment. Recent experience includes Microsoft Power Platform; current career focus is senior/lead frontend and full-stack engineering, cloud-enabled applications and AI-enabled products.

KEY SKILLS

Frontend	React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, AngularJS 1.4, jQuery, HTML5, CSS3, Bootstrap, Tailwind CSS, C3.js
Backend & APIs	Node.js, Express.js, REST APIs, GraphQL, JSON, C#, ASP.NET
Testing & Quality	Jest, Enzyme, React Testing Library
Architecture	Object-Oriented JavaScript, OOP, SOLID principles, reusable components, frontend architecture, requirements analysis, user stories, use cases, code coverage
Cloud / DevOps / AI	AWS fundamentals, CI/CD, deployment workflows, Docker and cloud-native concepts; Generative AI, LLM/RAG and AI application development (learning/portfolio focus)
Database & Tools	Microsoft SQL Server (MSSQL), MySQL, MongoDB Atlas (learning/AI-vector search focus), Visual Studio Code, Visual Studio

PROFESSIONAL EXPERIENCE

NTT DATA — Lead Consultant

Jan 2021 – Present | Bengaluru, India

- **Frontend engineering:** Worked with React.js, Next.js and JavaScript during approximately the first 3.5 years of tenure, contributing to component-based web application development and delivery.
- **Recent platform work:** Worked with Microsoft Power Platform, including Power Apps, SharePoint integration and Power Automate workflows.
- Collaborated with stakeholders to clarify requirements, implement enhancements, troubleshoot issues and support testing/deployment.

Harman Connected Services — Senior Product Engineer

2 years

- Frontend development, unit testing and automation testing for product/application delivery.

Infosys Ltd. — Senior Systems Engineer

1 year 2 months

- Requirements analysis, software development, unit testing and bug fixing.

Excelsoft Technologies Pvt. Ltd. — Software Engineer

3 years 1 month

- Developed, deployed, debugged and supported software applications; performed unit testing, bug fixing and implemented new user requirements.

SELECTED PROJECT EXPERIENCE

TESCO — TPS (Toolkit Trading Partner)

2019 – 2021

Technologies: React.js, Redux, Node.js, JavaScript, CSS3

- Worked on a metadata-driven application where UI and behavior were driven by attributes and values.
- Upgraded React and developed reusable components to create and search trading partners.
- Used TDD to meet coverage goals and built automated test suites using Cypress.
- Discussed user stories with the Product Owner; developed features/use cases, tested and deployed to the testing server.

TESCO — SLMEP (Supplier Life Cycle Management Enterprise Portal)

2018 – 2019

Technologies: React.js, Redux, Node.js, JavaScript, CSS3

- Developed React/Redux components for Documents, SystemLinks and Carousel modules and contributed to the BEANS component.
- Applied TDD and worked toward 100% code coverage across Node.js and React.
- Worked with the Product Owner on user stories, feature development, use cases, unit testing, automation and deployment.

Southern California Edison (SCE) — Account & Billing Platform

2017 – 2018

Technologies: React.js, Jest, HTML5, CSS3

- Contributed to electricity bill payment and account management, including registration, login and a dashboard with month/year-wise account details.
- Worked with the Business Analyst on user stories; developed features, performed unit testing and supported deployment.

Saras-K12 — Learning Management System

2014 – 2017

Technologies: React.js, HTML5, Bootstrap, Jest; MS SQL Server

- Worked on an online learning management system with SuperAdmin, Admin, HOD, Teacher and Student modules.
- Supported user creation, teacher-assigned homework, individual/group results, learning content, tests and student results.
- Discussed requirements with the Business Analyst, developed features/use cases, performed unit testing and deployment.

Saras — Parent Portal

2016 – 2017

Technologies: JavaScript, AngularJS 1.4, jQuery, Bootstrap, C3.js, HTML5, ASP.NET, C#; MS SQL Server

- Parent portal for children's school activities, teacher notifications and announcements, results, reports, performance and subject-wise achievements.
- Partnered with the Business Analyst on requirements; implemented features/use cases, unit tested and supported deployment.

ADDITIONAL TECHNICAL EXPERIENCE

Web development and deployment; requirements analysis; user-story refinement; use-case creation; reusable components; unit and automation testing; test-driven development; code coverage; debugging; bug fixing; implementation of user requirements; testing-server deployment; Product Owner and Business Analyst collaboration.

EDUCATION

B.E., Computer Science — Visvesvaraya Technological University, SDM Institute of Technology, Ujire, Karnataka	2013 67.03%
PUC — DPUE Karnataka, Composite Pre-University College, Bellary	2009 65.50%
SSLC — KSEB Karnataka, S.V.E.M.S High School, Koppal	2007 84.48%

ADDITIONAL INFORMATION

Languages: English, Kannada, Hindi, Telugu
